Profile

Cybersecurity and IT Infrastructure professional with 4+ years of experience supporting enterprise IT environments, monitoring system security, troubleshooting infrastructure issues, and maintaining operational continuity across fast-paced business environments. Skilled in cybersecurity fundamentals, endpoint security monitoring, threat awareness, infrastructure troubleshooting, and IT operational support.

Experienced in Microsoft 365 administration, Active Directory support, endpoint monitoring, vulnerability awareness, network troubleshooting, and security-focused operational support. Strong understanding of cybersecurity concepts including threat intelligence, incident handling, access management, security monitoring, and risk awareness through academic and practical exposure in enterprise environments.

Holds an MSc in Cybersecurity with strong interest in Threat Intelligence, SOC Operations, Threat Hunting, SIEM technologies, and cyber defense operations. A proactive and analytical professional committed to strengthening organizational security posture and supporting cyber resilience initiatives

Core Competencies

- Cybersecurity Operations Support
- Threat Intelligence Fundamentals
- Security Monitoring & Incident Awareness
- Endpoint Security & Antivirus Monitoring
- Active Directory & Access Management
- Microsoft 365 Security Support
- Network & Connectivity Troubleshooting
- SIEM & Security Operations Awareness
- Threat Hunting & IOC Awareness
- Vulnerability & Risk Awareness
- IT Infrastructure & System Support
- Incident Documentation & Reporting
- Security Compliance Awareness
- OSINT & Security Research Fundamentals

Professional Experience

Senior System Administrator, *Industrus Tech Pvt Ltd*

09/2020 – 05/2024

India

- Supported enterprise IT environments while maintaining operational continuity, endpoint security, and system reliability across fast-paced business operations
- Assisted in monitoring endpoint health, antivirus updates, security compliance activities, and operational system performance to maintain secure IT operations
- Supported Microsoft 365 services, Active Directory user management, and access provisioning activities while assisting users with technical and security-related support requests
- Troubleshot network, hardware, software, email, and connectivity-related issues including TCP/IP, DNS, DHCP, LAN, Wi-Fi, and VPN environments

- Assisted in identifying recurring technical issues and supported root-cause analysis activities to improve operational stability and reduce incidents
- Supported patch management, software deployment, system maintenance, and endpoint monitoring activities to strengthen system performance and operational security
- Maintained IT documentation, operational records, troubleshooting logs, and support reports for tracking, compliance, and operational visibility
- Coordinated with internal teams and vendors for issue escalation, technical troubleshooting, and operational support activities
- Assisted in user onboarding/offboarding activities including access provisioning, password management, and device configuration support
- Supported business continuity by ensuring infrastructure, endpoint devices, and communication systems remained operational and secure
- Utilized analytical troubleshooting and monitoring approaches to support operational security and timely incident resolution within enterprise environments

Education

Masters of Science in Cybersecurity , <i>De Montfort University</i>	09/2022 – 09/2023 United Kingdom
Bachelors in Computer Application , <i>Mangalore University</i>	07/2018 – 04/2021 India

Projects

Cybersecurity Lab Practice, *Hands-on Training & Academic Work*

- Performed vulnerability testing using DVWA and Kali Linux environments
- Identified and tested common web vulnerabilities such as SQL Injection and XSS
- Conducted network scanning and enumeration using Nmap
- Explored basic web application testing using Burp Suite
- Gained understanding of authentication flaws and input validation issues

ACADEMIC PROJECT, *Human Factors in Cybersecurity - MSc Cybersecurity – De Montfort University*

- Conducted research on the impact of human behavior on cybersecurity risks, focusing on social engineering and phishing attacks
- Analyzed how human error contributes to security breaches and explored mitigation strategies through security awareness
- Studied real-world attack scenarios involving user manipulation and behavioral vulnerabilities
- Proposed recommendations to improve organizational security through training and policy improvements
- Developed strong understanding of the relationship between human psychology and cybersecurity threats

CyberShield-Lab – Security Operations & Threat Monitoring Project

- Developing a cybersecurity-focused dashboard project designed to simulate SOC monitoring, incident visibility, and security operations workflows
- Working on integrating simulated real-time cyber threat visualization and monitoring capabilities to improve security event awareness and operational analysis
- Building features focused on threat intelligence concepts, security event tracking, and infrastructure monitoring within a centralized dashboard environment
- Exploring integration of security-focused analytics, alert visualization, and incident monitoring concepts to support cyber defense awareness and operational visibility
- Focused on strengthening practical exposure to SOC operations concepts, cybersecurity monitoring workflows, and security-focused application development

Technical Skills & Professional Strengths

- Microsoft 365 Administration
- Windows 10 / Windows 11
- Active Directory User & Access Management
- Networking Fundamentals (TCP/IP, DNS, DHCP, LAN, VPN)
- Endpoint Security & Antivirus Monitoring
- SIEM & SOC Concepts Awareness
- Security Monitoring Fundamentals
- Threat Intelligence & IOC Awareness
- OSINT Research Fundamentals
- ServiceNow & JIRA
- Remote Support Tools
- Hardware & Software Troubleshooting
- Patch Management & System Maintenance
- Analytical Thinking & Problem-Solving
- Technical Troubleshooting
- Communication & Documentation Skills
- Attention to Detail
- Incident Awareness & Escalation Support
- Time Management & Task Prioritisation
- Team Collaboration & Coordination
- Adaptability in Fast-Paced Environments
- Security & Risk Awareness
- Continuous Learning Mindset
